

Course Syllabus

Course Title and Code	Information Technology Project Management		
Semester	☐ First	☒ Second	Year 2025-2026

➤ Course Identification and General Information: **Don't Change**

Department	Information Technology		
Program Name	Master of Science in Information Technology (IT)		
	☒ By Course and Thesis	☒ By Course	
Course Type	☐ University	☐ College	☒ Department
	☒ Required	☐ Elective	☐ Track
Course Level	2	Credit Hours	3

➤ Course Instructor/Coordinator's: **Fill the Following**

Name	Fill here		
Office Number	Fill here		
Office Location	Fill here		
Office Ext.	Fill here		
Office Hours	Fill here		
E-Mail	Fill here		
Web Address	Fill here		
Class Information	☐ Male	☐ Female	☐ Both

➤ Learning Resources and Facilities: (References and Learning Resources) **Don't Change**

Essential References	Kathy Schwalbe, Information Technology Project Management, 8th Edition. Course Technology – Cengage Learning, 2014. ISBN-13: 978-1285452340.
Supportive References	- Project Management Institute (PMI). A Guide to the Project Management Body of Knowledge (PMBOK® Guide), 7th Edition. Project Management Institute, 2021. ISBN-13: 978-1628256642. - Project Management Institute official website: www.pmi.org
Electronic Materials	- Online case studies, project management tools, and simulations from PMI and other e-learning portals. - Access to university's E-Library databases (IEEE, ACM, ScienceDirect, Springer, Wiley).
Other Learning Materials	- Lecture notes, handouts, and instructor-provided resources. - Project management software tools (e.g., Microsoft Project, Primavera, Trello). - Recorded seminars, workshops, and webinars from industry experts.

➤ **Specific Course Information: Don't Change**

- **Catalog Description:** Fill Here.
- **Pre-Requisites:** None
- **Co-Requisites:** None
- **Required, Elective, or Selected Elective:** None

➤ **Specific Goals for the Course: Don't Change**

- Analyze advanced concepts, principles, and practices of IT project management and their applications in real world contexts.
- Design and develop project management processes across the phases of initiation, planning, execution, monitoring, controlling, and closure.
- Evaluate organizational dynamics, challenges, and opportunities that influence IT project success.
- Manage project scope, time, cost, risk, and quality using established project management frameworks.
- Apply advanced project management tools, techniques, and methodologies to ensure effective decision-making and project delivery.
- Demonstrate professional and leadership skills in managing stakeholders, communication, and teamwork within IT project environments.

➤ **Program Outcomes Addressed by the Course: Don't Change**

This course provides the following outcomes with the following relationship:

Master of Science in Information Technology <u>Program Outcome</u>	Relationship to <u>Course</u>
Demonstrate in depth knowledge of information technology theories and fundamentals of software development to describe computing-based solutions.	Not Related
Understand major research paradigms, methods, and innovations in Information Technology that contribute to the advancement of knowledge and professional practice.	Introduced
Communicate effectively in a variety of professional and research contexts.	Practiced
Analyze complex problems and apply principles of computing and other information technology disciplines to identify appropriate solutions.	Not Related
Design, implement and evaluate specialized technical solution to meet the requirements of individuals and institutions.	Introduced
Use specialized and advanced devices in practical activities related to the field of information technology.	Not Related
Work effectively within a team and lead it to accomplish tasks effectively in the field of information technology.	Practiced
Recognize professional responsibilities and make appropriate judgments in the field of information technology based on legal and ethical principles.	Not Related

➤ **Course Learning Outcomes (CLOs), Teaching Strategies and Assessment Methods: Don't Change**

Code	Course Learning Outcomes	Code of PLOs aligned with the program	Teaching Strategies	Assessment Methods
1.0	Knowledge and understanding			
1.1	Analyze advanced IT project management principles, methodologies, and frameworks across the full project life cycle.	K2	Lectures, Interactive Discussions	Written Exams, Quizzes
2.0	Skills			
2.1	Design and implement IT project management plans covering scope, time, cost, quality, risk, communication, and procurement.	S1	Group Projects, Case Studies	Project Presentations, Reports
2.2	Analyze and mitigate project risks using quantitative and qualitative assessment techniques.	S3	Exercises, Case Studies	Assignments, Project Reports
3.0	Values, autonomy, and responsibility			
3.1	Demonstrate professional leadership, ethical responsibility, and stakeholder engagement in IT project environments.	V1	Ethics in IT Discussions, Group Activities	Ethical Reflection Paper, Peer Evaluation

➤ **Outcome Assessment Tools: Don't Change**

1. Direct Assessment

- ☐ Midterm Written Exam I
- ☐ Midterm Written Exam II
- ☐ Final Written Exam
- ☐ Quizzes
- ☐ Homework
- ☐ Integrative Projects
- ☐ Students' Portfolios
- ☐ Case Study
- ☐ Oral Exams
- ☐ Written Reports
- ☐ Participation in Lecture
- ☐ Illustrative Presentations
- ☐ Use of Computer Facilities by Students
- ☐ Reading of References Related to Course Topics
- ☐ Team Work

2. Indirect Assessment

- ☐ Pre-Course Questionnaire
- ☐ Post-Course Questionnaire
- ☐ Group Discussions

☐ Students' Interviews

➤ **Class Information and Rules: Don't Change**

- All the exams will be closed book. You must demonstrate all the steps of your work to ensure full marks for each of the questions. Please bring your personal stationeries, e.g., pen, pencils, eraser, calculator, etc., during the exams and quizzes.
- There will be 1 group presentation assignment for this course. Every group leader is responsible to email me mentioning group members' names and IDs along with a proposed project related to this course for my approval. If you are unable to be with a group and/or chose a presentation topic, the instructor will do it for you after the due date.
- **Re-check Policy:** If anyone wants to re-check any of his exam paper, he has to inform me within one (1) week of that grade publication date. No re-check/re-marking at the last class week of the semester.
- **Missed Exams Policy:** For this course, if you have a genuine excuse approved and stamped by the student affair office, only one Midterm exam will be retaken with a new set of questions.
- **Attendance Policy:** Attendance will be taken on every class. No attendance for the late comers (after 10 minutes of the class starting time).

➤ **Grading Scale: Don't Change**

A+	(95% or more)	C	(70% - 74%)
A	(90% - 94%)	D+	(65% - 69%)
B+	(85% - 89%)	D	(60% - 64%)
B	(80% - 84%)	F	(less than 60%)
C+	(75% - 79%)		

➤ **Students Assessment Activities: Don't Change**

No	Assessment Activities *	Assessment Timing (in week no)	Percentage of Total Assessment Score
1.	Midterm Exam (written exam: problem-solving + case analysis)	8	20%
2.	Research Project (report + presentation)	13-14	30%
3.	Final Exam (comprehensive written exam covering all CLOs)	Final Exams Period	50%
Total			100%

➤ **Course Outline: Don't Change**

No	List of Topics	Contact Hours
1.	Introduction to Project Management (concepts, importance, and applications in IT)	3
2.	Project Management and Information Technology Context	3
3.	Project Life Cycle and Process Groups: A Case Study	3
4.	Advanced Concepts for Project Integration Management	3
5.	Advanced Concepts for Project Scope Management	3
6.	Advanced Concepts for Project Time and Scheduling Management	3
7.	Advanced Concepts for Project Cost and Budget Management	3
8.	Advanced Concepts for Project Quality Management	3
9.	Advanced Concepts for Project Human Resource and Team Management	3
10.	Advanced Concepts for Project Communications and Collaboration Management	3
11.	Advanced Concepts for Project Risk Management	3
12.	Advanced Concepts for Project Procurement and Contract Management	3
12.	Advanced Concepts for Project Stakeholder and Governance Management	3
14.	Midterm Exam	3
15.	Final Exam	3
Total		45 Hours

Notes: Don't Change

- A 3 Credit Theory-Course should utilize **45 Contact Hours** in 15 Weeks.
- Each theory-credited **Contact Hour** is equivalent to **50 lecture minutes and 10 minutes of rest**.
- **1 Track by Course and Thesis: 37 Credit Hours (28 Credit Hours as Courses + 9 Credit Hours Thesis)**
 - Compulsory Courses: (16 Credit Hours)
 - Elective Courses: The student chooses 4 courses 12 Credit Hours
 - Thesis: (9 Credit Hours)
- **2 Track by Course: 34 Credit Hours (30 Credit Hours as Courses + 4 Credit Hours Research Projects)**
 - Compulsory Courses: (15 Credit Hours)
 - Elective Courses: The student chooses 5 courses 15 Credit Hours
 - Research Project: (4 Credit Hours)

➤ Course Schedule: **Fill the Following**
